

Persona 1: Ayesha

USER PERSONA

PROFILE

Name

:

Ayesha Khan

Gender

:

Female

Age

:

25

Education

:

Bachelor's in Media Studies

Occupation

:

Freelance Illustrator

Address

:

Lahore, Pakistan

Autism Level

:

Level 2 (needs some support with communication and daily structure)

"Sometimes, I know exactly how I feel... but I just can't explain it in words."

GOALS

Express emotions without needing complex words

Reduce emotional meltdowns and anxiety

Follow a calming, structured daily routine

Use apps without getting overwhelmed

FRUSTRATIONS

Gets easily overstimulated by noisy or crowded apps

Has difficulty explaining feelings in therapy

Feels misunderstood when her mood changes quickly

Finds most mental health apps too generic

PERSONALITY

Persona 2: Dr. Hadi

USER PERSONA

PROFILE

Name

:

Dr. Hadi Qureshi

Gender

:

Male

Age

:

32

Education

:

Phd. in Physiotherapy

Occupation

:

Therapist (Specializes in Autism Spectrum Disorders)

Address

:

Islamabad, Pakistan

Clients

:

Mostly teens and young adults with Autism Level 1 & 2

"Tracking behavior patterns helps me offer the right support. But most tools aren't autism-friendly."

GOALS

Help clients recognize and manage emotions independently

Get visual, behavior-based reports for tracking therapy progress

Recommend calming tools for sensory regulation

Reduce dependency on verbal-only communication

FRUSTRATIONS

No centralized, autism-friendly app for emotional tracking

Clients struggle with daily self-monitoring

Generic therapy apps don't suit neurodivergent needs

Parents and caregivers often miss early signs of distress

Persona 3: Sadaf

USER PERSONA

PROFILE

Name

:

Sadaf Rehman

Gender

:

Female

Age

:

44

Family

:

Lives with her husband and 19-year-old son, Ayaan, who has Autism Level 1

Occupation

:

Homemaker

Address

:

Lahore, Pakistan

Daily Role

:

Full-time caregiver and emotional support for her son

"I want to understand my child's feelings before things escalate. But he doesn't always tell me what's wrong."

GOALS

Understand emotional changes in her son before a meltdown

Use visual cues and mood tracking to support daily communication

Establish calm, structured daily routines

Promote independence while still providing care

FRUSTRATIONS

Her son often shuts down or avoids expressing emotions

Doesn't always recognize early signs of distress until it's too late

Most apps are complex and not suited for neurodivergent users

She lacks guidance on what tools or methods are most effective

Context

Autistic adults often face emotional burnout, routine disruption, and tech overload. Most existing mental health apps are not built with autism in mind — lacking structure, visual aids, and sensory consideration. Clear Spectrum bridges this gap with a calm, personalized experience tailored for autism-specific needs.
